REASONS FOR ALLOWANCE

Claims 1-12 are allowed.

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: the prior art does not disclose or fairly suggest the claimed methods as amended in the response filed 23 November 2010 without engaging in impermissible hindsight to arrive at the combined claimed method elements. More specifically, attention is directed to the arguments, filed 16 August 2010, presented in response to the rejection over Tang et al (evidenced by translation) in view of Kistler and the White et al reference.

The newly cited art is cited to further show the state of art. Lee et al, US 6,670,402, is directed to rapid aerogel production processes. Lee et al (column 7, lines 18-42) discloses the optional addition of solvent to maintain wet gels during loading for vapor phase extraction. Lee et al lacks a teaching of the steps of producing sodium silicate and/or aerogels from rice husk ash and the addition of alcohol functioning as a super-critical fluid.

Frank et al, US 5,133,859, discloses methods and apparatus for extracting samples employing super-critical carbon dioxide as an extraction replacement for several preparative procedures including Soxhlet extraction among others. Frank et al lacks a teaching of the steps of producing sodium silicate and/or aerogels from rice husk ash, a combined use of super-critical carbon dioxide extraction with Soxhlet extraction, and the addition of alcohol functioning as a super-critical fluid.

Iler, US 2,657,149, discloses esterifying the surfaces of silica substrates. Iler (column 7, lines 50-54; and column 10, lines 42-48) disclose formed aerogels as substrates for esterification and discloses washing or extraction of the esterified materials with solvent, *e.g.*, methyl ethyl ketone, employing Soxhlet extractor. Iler lacks a teaching of preparing the aerogels, the steps of producing sodium silicate and/or aerogels from rice husk ash, an extraction of water with alcohol by Soxhlet extraction, and the addition of alcohol functioning as a super-critical fluid.

The Lee et al, Frank et al and Iler references lack a teaching of the claimed methods and the combination of Lee et al and/or Frank et al with Tang et al process would entail impermissible hindsight to arrive at the combined claimed method elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
